

HEATING SOLUTIONS FOR THE BIO-PHARMACEUTICAL INDUSTRY

WITH POWERBLANKET

TO KEEP UP WITH DEMAND, A GLOBAL HEALTHCARE COMPANY NEEDED A FAST HEATING SOLUTION CUSTOM FIT TO THEIR NEEDS

WHAT WAS THE PROBLEM?

A global healthcare company that researches, develops, and manufactures medicines, vaccines, and other consumer healthcare products needed additional heating solutions to help them increase their batch sizes.

The pharmaceutical company typically relies on on-site industrial heating ovens. However, global health demands have greatly increased due to the COVID-19 pandemic. Their ovens alone could no longer help them keep up with demand. The oven manufacturer could not fulfill their heating needs quickly enough.

I would recommend Powerblanket as a quick and effective solution to any fast track project requiring heat.

PATRICK V. | PROJECTS MANAGER

Patrick, the company's Engineering Projects Manager, said:

"the delay to get an oven was 16 weeks minimum and we couldn't wait that long to get a solution...we need[ed] a solution that was quick to put into place and affordable."

The company not only needed quick and efficient heating for a large quantity of 55 gallon drums, they also needed a custom heating solution for 1000 liter tanks. For most manufacturers, customization is a time consuming process. Fortunately, the pharmaceutical company turned to Powerblanket.

THE POWERBLANKET SOLUTION

In addition to 19 ready-to-ship barrel and drum heat-

POWERBLANKET OFFERS EFFICIENT READY TO SHIP PRODUCTS AS WELL AS THE FASTEST CUSTOMIZATION ON THE MARKET

ers, Powerblanket's team of engineers quickly created a custom tank heating solution that was perfectly tailored to fit their 1000L tanks.

The company described Powerblanket's solution as "convenient and effective." Patrick had a wonderful experience working with the customization team and said:

"I've received such good service from your sales representative and your engineering team."

TOTAL TEMPERATURE CONTROL

Our ready-to-ship heating solutions distribute heat evenly and efficiently, eliminating hot and cold spots. We can help optimize operations, protect critical materials and equipment and save time and money.

For heating needs that require precise specifications, our world class engineering team guarantees a quick and painless customization process. Get solutions built to fit your exact temperature requirements, dimensions, thermostatic control needs and more.

Powerblanket specializes in putting total temperature control solutions in the capable hands

of innovative manufacturers. We are proud to offer a wide range of high quality industrial heating and cooling solutions that help the bio-pharmaceutical industry work safely and more efficiently.
