Choose Rittal For Maximum Flexibility Delivers Maximum Cost-Efficiency

Rittal has redefined the standard in Server and Network enclosures with the TS IT modular system, featuring tool-less, snap-in installation technology that improves operating efficiency while reducing costs. Easy to deploy and providing a stable and secure installation environment for IT equipment, the TS IT system can be easily reconfigured to meet future installation demands. With a streamlined design providing an optimum price/performance ratio, the TS IT system establishes a new standard in functionality, supporting the demanding requirements placed on today's server and network enclosures.

- Most commonly requested dimensions – 24"/28"/32" widths. 40"/42"/48" depths.
- Offset positioning for mounting widths of 19", also 21" and 23" possible with 28" and 32" wide enclosures
- Viewing door or 85% perforated door options
- 180-degree hinges on both front and rear doors for unhindered access
- Roof with dual front to rear brush baffled openings can be removed without disconnecting cables
- High load carrying capacity—up to 3,300 lbs
- Engineered solutions for cable routing and management
- Seamless integration with all of Rittal's LCP in row cooling options
- Comprehensive range of accessories for power, cable and air flow management
- Tool-free installation of many accessories

How TS IT Makes IT Fast

- Design flexibility allows integration of high density solutions
- Integrated design process ensures compatibility across different configurations
- Snap-in technology allows for fast assembly of accessory components

The TS IT delivers dimensional flexibility and supports the integration of a variety of IT solutions to support numerous network configurations. To adjust the 19-inch levels, just loosen the quick-release fastening, then slide and lock the mounting angles at the required depth. Lateral offset positioning allows for asymmetrical interior installations and makes it easy to select mounting widths greater than 19 inches.

With the greatest amount of internal useable volume, the TS IT has room for everything. New Ethernet technologies such as 10 GB or 40 GB (with their higher cabling demands) are easily supported. Cabling can be routed via the roof, from the sides or from the base.

How TS IT Makes IT Simple

- High load carrying capacity—up to 3,300 lbs
- Intelligent cable management system
- Extensive range of accessories

The TS IT can support up to 3,300 lbs. without any additional screw joints, a capability made possible by our depth stays that transmit the load to the enclosure's frame. The quick-release fasteners simplify initial assembly, any subsequent modifications, and installation of accessory components.

For added safety, the tool-free installation accessories (cable duct, air baffle plate, cable route and floor holder) have integrated holes to allow optional screw fastening. Slide rails, component shelves, telescopic slides and more simply snap into the rear sections and hook into the front EIA rail sections.

custom design options

System Accessories

Viewing and Vented Doors

Choose glass for rack climate control or vented for room climate control.

Base/Plinth System

Flexible base/plinth system for practically every application.

Airflow Options

Baffles, gland plates and blanking panels designed to provide optimal air flow in an enclosure.

Security Options

Flexible access, either 3-digit code keyless or master control functionality.

Cable Management

Ducts, fingers, cable management panels, cable management walls and D-rings keep cables organized.

Shelving and System Chassis

Install heavy equipment securely within a 19-inch rack.
